Andrew Grini

Frontend Developer JavaScript | React

Chişinău

Summary

Hello, I'm in passion with programming.

Now I am focused on Front-end development.

I'd like to get a job in respectfull organization, that's why I train my skills constantly.

I'm good in JavaScript and I am junior in React.

I'm familiar with agile workflow tools including JIRA/Trello/Bitbucket/GitHub/GitLab, Webpack, Firebase, Nodemailer, Adobe design products, etc.

In 2014 I built simple sites on HTML5 and CSS3 with simple JS involving, praticed Joomla and Wordpress. It was more like a hobby, but with small commercial success.

In 2019 I decided to make Front-end development my profession. I studied hard and as a result I can create projects using JavaScript ES6 and React library.

I don't want to stop and continue my education at free time. I'm interested now in React, Angular and Node JS.

Now I am Junior React developer. I am focused on this library, because it gives great possibilities in creating difficult web and mobile apps, it is very flexible and can be used with other libraries and frameworks.

Experience

Freelance

Frontend Developer
